Table of contents

1 Introduction

1.1 The social importance of professional education

1.2 Patterns in professional work – introducing epistemic forms and games

1.3 Seeing through the changing surface of professional work and knowledge

1.4 Research on education, learning and expertise: from shifts in fashion to an integrated account

1.5 Our empirical research

1.6 Overview of the book: key ideas

1.7 Reading the book: online glossary

2 Professional work in contemporary contexts

2.1 Professions and professional work

2.2 Demands of contemporary professional work

2.3 Preparation for the professions in higher education

2.4 Approaches within professional education

2.5 Concluding points

3 Defining the problem: four epistemic projects in professional work and education

3.1 Crafting expert practitioners

3.2 The reflective-rational project: From rational knowledge to reflective practice to rational reflection

3.3 The reflective-embodied project: Skill and the ontological turn in practice

3.4 Representational and performative accounts, and the need to cross boundaries

3.5 The knowledge building project: From practice as knowledge transfer to knowing as epistemic practice

3.6 The relational project: From individualistic to relational expertise

3.7 Combining the four epistemic projects: Knowledge for doing and knowledge for innovation and learning

4 The shapes taken by personal professional knowledge

4.1 What knowledge is

4.2 Public, personal and organisational knowledge

4.3 Doing and understanding

4.4 Knowledge and knowing

4.5 Tacit knowledge and explicit learning

4.6 Actionable knowledge

5 Professional knowledge and knowing in shared epistemic spaces: the person-plus perspective

5.1 Relational expertise and inter-professional work

5.2 (Re-)presenting knowledge and shared epistemic labour

5.3 Continuity of practice and innovation: knowing with and through objects

5.4 Linking epistemic practice with knowledge culture

5.5 Knowledge space and epistemic assemblage131

5.6 Creating assemblages for local knowledge work

5.7 Knowledge and knowing in shared epistemic spaces

6 Understanding the mind

6.1 Understanding the human mind and learning: experience, brain, environment and culture

6.2 From cognition as structure to cognition as coordination and enaction

6.3 Learning and conceptual change: Formal concepts and experiential knowledge

6.4 Troublesome knowledge and threshold concepts

6.5 Grounding conceptual knowledge in experience: situated concepts

6.6 Conceptual understanding and actionable knowledge

6.7 Transfer

6.8 Dynamic expertise, transfer and innovation

7 Epistemic thinking

7.1 Knowledge and knowing as an open system

7.2 Personal epistemology, epistemic thinking and epistemic resources

7.3 Personal epistemology: classical accounts

7.4 Personal epistemology research: critique and new directions

7.5 The division of cognitive labour: epistemological implications

7.6 The changing scope of epistemic cognition

7.7 The epistemic resources view

7.8 Epistemic affordances

7.9 Cognitive and epistemic flexibility

8 Objects, things and artefacts in professional learning and doing

8.1 Assessment tasks in professional education

8.2 Knowing through objects: Objectual practices in learning and work

8.3 Motives, objects and things

8.4 Finding objects for professional education and reifying them in material artefacts

8.5 A case: Assembling objects and things in an epistemic artefact

8.6 Perception, skill and artefact

8.7 Understanding tasks and artefacts

8.8 Knowledge work and conceptual artefacts from the perspective of professional practice

9 Epistemic tools and artefacts in epistemic practices and systems

9.1 Epistemic practice

9.2 Epistemic tools

9.3 Action, meaning and (epistemic) practice

9.4 Understanding epistemic qualities of artefacts: results from artefact analysis

9.5 Epistemic openness: knowledge practice systems

10 Inscribing professional knowledge and knowing

10.1 Inscriptions in professional work and learning

10.2 Functional properties of knowledge inscriptions

10.3 Skill for seeing, inscribing and knowing the world

10.4 Becoming a school counsellor through inscribing students' behaviour

10.5 Skill for seeing, inscribing and knowing work

10.6 Analysis of students' inscriptions of knowledge and work

10.7 Some insights into the functional (pedagogical) properties of learning inscriptions

10.8 From inscribing to re-presenting: personal, system and enactive views of inscriptions

11 Inscriptions shaping mind, meaning and action

11.1 How meanings get expressed and inscribed in knowledge production

11.2 How meanings get expressed and inscribed in professional learning

11.3 Unpacking the semiotic nature of professional knowledge work

11.4 What ways of knowing and slices of knowledge get inscribed?

11.5 Conceptual integration and material blending

11.6 An Example: Blending, projecting and enacting through inscribing a lesson

11.7 Creating actionable epistemic spaces through grounding and blending

12 Epistemic tools, instruments and infrastructure in professional knowledge work and learning

12.1 Epistemic tools, infrastructures and practices

12.2 Instrumental genesis: linking tool and game

12.3 Epistemic tools and infrastructures for professional work

12.4 An example: Epistemic infrastructure for child behavioural assessment

13 Taxonomies of epistemic tools and infrastructures

13.1 A taxonomy of epistemic tools

13.2 A taxonomy of epistemic infrastructure

13.3 Learning as inhabiting an epistemic infrastructure

14 Professional epistemic games

14.1 Introducing the idea of epistemic games

14.2 Illustrating the idea of epistemic games in professional practice: an example from pharmacy

14.3 Creating a taxonomy of epistemic games: approach and rationale

14.4 The taxonomy of epistemic games

15 Weaving ways of knowing

15.1 Medication Management Review as “Signature pedagogy”

15.2 Social infrastructure

15.3 Epistemic infrastructure

15.4 Assembling and weaving

15.5 The medication review form as a modelling site

15.6 Linking conceptual and material with social: weaving epistemic games with social (bureaucratic) infrastructure

15.7 Concluding points

16 Rethinking the material, the embodied and the social for professional education

16.1 Epistemic games in course designs: some empirical illustrations

16.2 Actionable knowing as embodied social practices in the material world

16.3 How matter matters in professional knowledge work

16.4 Learning and thinking with social others

16.5 Four kinds of mediation: tools, social others, artefacts and self

16.6 Concluding points: learning in “thin” and “thick” social and material environments

17 Conceptual resourcefulness and actionable concepts: concepts revisited

17.1 Concepts revisited

17.2 Some examples: ‘Constructivism’ and other concepts in abstract notions, contexts and actions

17.3 Concepts in mind and in discourse

17.4 Abstract, contextual and situated concepts

17.5 Actionable concepts

17.6 A case: constructing actionable concepts

17.7 Actionable concepts as concepts that mean and matter

18 Epistemic resourcefulness for actionable knowing

18.1 Understanding epistemic resources

18.2 Epistemic resources in discourse and the mind

18.3 Actionable epistemic resources

18.4 Linking epistemic and conceptual: dynamic view of conceptual learning

18.5 Framing, stability and coherence

18.6 Learning to coordinate diverse ways of knowing

19 Teaching and learning for epistemic fluency

19.1 Introduction

19.2 Approach One: Learning by knowledge integration

19.3 Approach Two: Learning by playing epistemic games

19.4 Approach Three: Learning by designing knowledge

19.5 Approach Four: Learning by designing inquiry

19.6 Concluding comments

20 Creating epistemic environments: learning, teaching and design

20.1 From rational thought to embodied skill to grounded actionable knowledge

20.2 What is knowledge, revisited: dynamic knowledge, grounded concepts and embodied epistemic environments

20.3 Learning by creating an epistemic environment and constructing a conscientious self

20.4 Designing for epistemic fluency
